Application/Control Number: 08/823,980

Art Unit: 1644

- 1. Claims 41-44,52,55,56 are under consideration.
- 2. The rejection of claim 53 as provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 51 of copending Application No. 08/437952 is withdrawn in view of the cancellation of said claim
- 3. Regarding the double patenting rejections in paragraphs 5-7 of the previous Office action, while said rejections were formulated and explained as obviousness type double patenting, reference was incorrectly made to Schneller type double patenting. Said rejections were intended as obviousness type. Applicant responded to the rejections as obviousness type double patenting.
- 4. The rejection of claims 41-44,52,55,56 and 53 as provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21,47,51,54 of copending Application No. 08/437952 is withdrawn in view of the TD filed 8/23/2004 and the cancellation of claim 53.
- 5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 08/823,980

Art Unit: 1644

6. Claims 41-44,52,55,56 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 43,44,47,48,50,51 of copending Application No. 08/438183. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

The two sets of claims are drawn to immunogenic compositions/peptides versus immunogenic compositions which differ in scope but contain the same peptide/peptide conjugates. The peptide of SEQ. ID. NO:8 is derived from HCV and is the same in both applications. The agents of claims 43 and 44 are well known in the art as linking agents.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Regarding applicants comments, the MPEP section 804.02, part IV. states:

## IV. DISCLAIMING MULTIPLE DOUBLE PATENTING REFERENCES

If multiple conflicting patents and/or pending applications are applied in double patenting rejections made in a single application, then prior to issuance of that application, it is necessary to disclaim each one of the conflicting double patenting references applied, rather than disclaiming only the conflicting double patenting reference with the earliest issue date (assuming at least one of the references is a patent). A terminal disclaimer fee is required for each terminal disclaimer filed. To avoid paying multiple terminal disclaimer fees, a single terminal disclaimer may be filed, wherein all the conflicting double patenting references are disclaimed therein.

Disclaiming each one of the conflicting double patenting references is necessary to avoid the problem of dual ownership of patents to patentably indistinct inventions in the event that the patent issuing from the application being examined ceases to be commonly owned with any one of the double patenting references that have issued or may issue as a patent. Note that 37 CFR 1.321(c)(3) requires that a terminal disclaimer "[i]nclude a provision that any patent granted on that application or any patent subject to the reexamination proceeding shall be enforceable only for and during such period that said patent is commonly owned with the application or patent which formed the basis for the rejection."

Application/Control Number: 08/823,980

Art Unit: 1644

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 42-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 42-44,55 lack antecedent basis in the recitation of "immunogenic polypeptide" because claim 41 is drawn to a fusion protein, not an "immunogenic polypeptide". The claims should be amended to read on a fusion protein. For example, claim 42 could be amended to read "fusion protein of claim 41 wherein the immunogenic polypeptide is linked ...".

- 9. No claim is allowed.
- 10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron Schwadron, Ph.D. whose telephone number is 571 272-0851. The examiner can normally be reached on Monday-Thursday 7:30-6:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 571 272-0841. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
